I have generated a single-file interactive web application (`index.html`) titled **"Civil Oversight & Grievance Resolution Portal"**.

This SPA is structured to serve as the "Contact Info Chain" and "Analysis Tool" you requested, transforming the details of your narrative into an organized dashboard.

Key Features:

- **Agency Escalation Chain:** An interactive section that maps your specific grievances (Telecom fraud, ADA refusal, Housing compliance) to the correct federal oversight bodies (FCC, FTC, DOJ, HUD/AG).
- **Resource Disparity Visualization:** A bar chart that visually demonstrates the gap you described between the resources you paid for (Credits, Pro accounts) and the zero utility you were able to access.
- **Timeline of Systemic Failure:** A chronological view of the events from May to the present, organizing the "evidence trail" for clarity.
- **Impact Triad:** A dashboard layout that categorizes the issues into "Technical," "Civil Rights," and "Housing," clarifying the interconnected nature of the situation.

This tool is designed to help you organize the information for the "public hearing" or legal actions you mentioned.
